

Flow Chart for Using Health Card in Clinic

Daily Prep: 10 cards placed in stand and stand placed in waiting room or exam room. An appropriate staff person can invite patients to review the card's contents in the waiting room and then ask questions during their exam.

Dialogue: "The doctor invites you to review the card while you are waiting and to take it into the exam room with you if you like."

Patient exposed to card in waiting room

If patient picks up card, then may take to exam room

Patient exposed to card inside exam room

Exam Room
Healthcare professional asks adult patients whether they picked up the card and if they have any questions.

Dialogue: "The doctor invites you to review the card while you are waiting."

Dialogue: "Did you happen to pick up the health test card available at the clinic today? It contains important information about tests that can help you determine your risk for the most common chronic diseases or detect them early so you can increase your chances for a longer, healthier life. Do you have any questions about the card? Are there any tests you need at this time?"
